DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 8, 12, 16, 18 and 21-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Bozzo.

Bozzo shows a spray container 10 having a light beam positioning arrangement 20, mounting structure 30, actuator 60, manually operable trigger 26, and power supply 58.

The device shown by Bozzo will inherently perform the steps recited in the method claims during normal operation of the apparatus.

Allowable Subject Matter

3. Claims 5-7, 9-11, 13-15, 17, 19, 20 and 26-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goldin et al., Brack, Dougherty, Foster and Whalen all show devices in the general state of the art of the invention.
